DevOps Engineer | MERN & JAVA
Developer | Solution Architect
(AWS)

WWW:

<https://github.com/KaustubhLabade>

WWW:

<https://www.linkedin.com/in/kaustubh-labade/>

Skills

- Cloud and web design
- DevOps: AWS, Azure, RedHat, Terraform, K8s, Docker, Ansible, Prometheus, Grafana, Jenkins
- React, Redux, jQuery, API handling, CORS, WebSockets, Node.js, Express.js
- Amazon Web Services: Solution Architect
- Quality assurance testing: Selenium
- GenAI: Generative AI, prompting, automation, reasoning, fine-tuning, LLMs, workflows, synthesis, troubleshooting
- Programming languages: Java, C++, React, Python
- Java (Core Java, OOP Concepts, Collections, Exception Handling, Multithreading)
- Spring Boot, Spring Framework, Hibernate (ORM), Microservices Architecture, JDBC
- MySQL, SQL, Database Design, CRUD Operations

Education And Training

Bachelor Of Engineering:

Computer Engineering

P.E.S Modern College Of Engineering

Pune

- **7.50 GPA**
- **Volunteer Work** Experience

Kaustubh Labade

Experience

HighwayPluss (Self Employed) - Software Programmer Intern

Pune, India

12/2023 - Current

Highway+ | Full Stack & Mobile Application Project

- Built a scalable full-stack highway logistics platform using **React, Redux, Express.js, MongoDB**, and **React Native**.
- Designed secure **RESTful APIs** with proper **CORS** handling and integrated **WebSockets** for real-time updates and tracking.
- Developed responsive web and mobile interfaces using Tailwind CSS, and efficient state management with Redux.
- Implemented notification and messaging systems using **Mailtrap, AWS SNS**, and integrated external services via **APIsetu**.
- Followed modular architecture, clean API contracts, and optimized database operations for performance and scalability.

Bluestock Fintech - Software Engineering (Java) Intern

Online, India

08/2025 - 11/2025

Project: Banking System (ATM Simulator)

Technologies: Java, SpringBoot, Hibernate (ORM), JDBC, Microservices

- Developed a Java-based ATM simulation application implementing core banking operations such as account creation, balance inquiry, deposit, withdrawal, and transaction history.
- Applied Object-Oriented Programming concepts and built backend services using **Spring Boot**, with **Hibernate ORM** for efficient database management.
- Designed the system following **microservices architecture principles** and integrated secure database connectivity using JDBC for user authentication and transaction handling.

DevOps Projects

• **Three-Tier Web Application Deployment : AWS | DevOps**

Deployed a secure 3-tier architecture using AWS VPC, EC2, RDS, Application Load Balancer, and S3 with IAM-based access and PM2 for runtime automation.

• **Containerization Using Docker - CI/CD Ready Setup**

Built and deployed applications using Docker images and containers, configured networking, volumes, custom Dockerfile, and used Jenkins/Docker Hub workflow for scalable delivery.

• **Kubernetes Deployment - Minikube / K8s Cluster**

Deployed application on Kubernetes using Pods, Deployments, Services, ConfigMaps, and scaling using kubectl for high availability and orchestration.

- **Pests Classification using Convolutional Neural Network and Reinforcement Learning** Thesis
- Selected for College Exhibition
- Published Research Paper

12th HSC:

Bifocal - Electronics

Fergusson College

Pune

- Project Made - **Traffic Signal System**
- Percentage - **70%**
- Special Subject - **Electronics**

10th SSC:

Science Education

Pune Police Public School

Pune

80% Percentage

Above Distinction in all

Department

Certifications

- **AWS** badges
- Generative AI by **Databricks**
- Space Program in Python by **Spaceonova**
- Git and GitHub by **Codecademy**
- Tableau Certification Course by **Edureka**
- Web Development by **Smartknower, Codingninjas**

Academic Projects

- **Pesticide Classification** using CNN and Reinforcement Learning (Computer Engineering Project).
- **Traffic Signal System** using Integrated Circuits and Designing PCBs.
- **Potato Battery** using Copper and Zinc Reaction by using more than 6 potatoes
- Some Basic **Programming Projects** are uploaded on **GitHub**

Accomplishments

Gold Badge @ **Hackerrank**

Data Scientist @ **DataCamp**

Kubernetes And Dockers @ **FreeCodeCamp**

Full Stack Development in Java and Data Structures in Java @ **Codingninjas**

Programmer in Python, C++, JavaScript, TypeScript @ **Sololearn**

Activities And Honors

College Ambassador @ TechFest IIT Bombay

Campus Ambassador @ AngelHack
